## EDUCATION

### Bachelor of Technology

Mahatma Gandhi Mission's College Of Engineering & Technology, Noida

08/2019 - 06/2023

Uttar Pradesh

Courses

- 8.3 cpga

## WORK EXPERIENCE

### Frontend Developer Intern Trainee

Thales, Noida

06/2022 - 07/2022

Achievements/Tasks

- Built a responsive website for company's use having multiple forms using **Angular** and **Bootstrap**. Worked under the project "Ezio DS3", a responsive website for company's use.
- The website had multiple forms and the task was to auto-fill those forms based on data coming in **JSON** Format.

### Frontend Developer

Build With Innovation

09/2022 - 03/2023

Netaji Shubhash Place

Achievements/Tasks

- Worked on multiple **live websites** and **apps**, styled components using Material Angular, Bootstrap, etc., and delivered them as per client's requirements.
- Built using **Ionic**, **Angular** and **Firebase**.
- Worked on various website admin panels, performed CRUD (Create, Read, Update, Delete) operations and styled websites using material angular. Additionally, I deployed and maintained the website's database and authentication systems using **Firebase**.

### Web Developer

Techbets InfoTech

05/2023 - 2023

Delhi

Achievements/Tasks

- Developed role-based Student Management System with file imports, PostgreSQL database storage, and tailored screens for students, approvers, and admins
- Implemented API endpoints for data submission and retrieval, enabling efficient communication.
- Created automatic result generation logic, offering detailed performance insights for students.

## SKILLS

HTML

CSS

JavaScript

React

Angular

Ionic

Problem-solving

Fast Learner

PostgreSQL

## PERSONAL PROJECTS

### My Portfolio

- <https://main--sparkly-bavarois-f24a18.netlify.app/>
- Designed and developed a personal portfolio website using React and Tailwind CSS.
- Leveraged Netlify to deploy the portfolio, ensuring continuous availability and easy updates.

### Full Stack Amazon Clone

- <https://clone-c9f72.web.app/>
- Designed and developed the entire **full stack application** from scratch, and styled it using **Material UI**
- Added **authentication** using **Firebase**, allowing users to create accounts and log in using their credentials
- Implemented full shopping cart functionality, including adding products and checking out
- Used **Stripe** for payment processing, with API calls made using **axios**.
- Deployed the application using **Firebase**

### Netflix Clone

- <https://netflix-clone-bb46e.web.app/>
- This project is a simplified front end clone of Netflix. It was created with React and CSS (Grid and Flexbox).
- It uses [The MovieDB Api](#) to search for movies and display the details.
- It is deployed using **Firebase**.

### Todo App

- <https://todo-app-4000a.web.app/>
- Built a todo app website using **React** and styled it with Material UI
- Implemented **CRUD** (Create, Read, Update, Delete) operations using **Firebase** for data storage
- Deployed the website using **Firebase** for hosting
