EDUCATION

B.Tech (Computer Science)
Mahatma Gandhi Mission's College Of Engineering & Technology, Noida

08/2019 - 06/2023   *Uttar Pradesh*

Courses
- 8.9 cpga

WORK EXPERIENCE

Frontend Developer Intern Trainee
Thales

07/2022 - 08/2022   *Noida*

Achievements/Tasks
- Built a responsive website for company's use having multiple forms using **Angular** and **Bootstrap**. Worked under the project "Ezio DS3" , a responsive website for company's use.
- The website had multiple forms and the task was to auto-fill those forms based on data coming in **JSON** Format.

Frontend Developer
Build With Innovation

09/2022 - 03/2023   *Netaji Shubhash Place*

Achievements/Tasks
- Worked on multiple **live websites** and **apps**, styled components using Material Angular, Bootstrap, etc. , and delivered them as per client's requirements.
- Built using **Ionic**, **Angular** and Firebase.
- Worked on various website admin panels, performed CRUD (Create, Read, Update, Delete) operations and styled websites using mat angular. Additionally, I deployed and maintained the website's database and authentication systems using **Firebase**.

Web Developer
Techbets InfoTech

05/2023 - 2023   *Delhi*

Achievements/Tasks
- Developed role-based Student Management System with file imports, **PostgreSQL** database storage, and tailored screens for students, approvers, and admins
- Implemented API endpoints for data submission and retrieval, enabling efficient communication.
- Created automatic result generation logic, offering detailed performance insights for students.

SKILLS

HTML   CSS   JavaScript   Angular   React

Ionic   Firebase   Express   Node   PostgreSQL

PERSONAL PROJECTS

My Portfolio
- https://main--sparkly-bavarois-f24a18.netlify.app/
- Designed and developed a personal portfolio website using **React** and **Tailwind** CSS.
- Leveraged Netlify to deploy the portfolio, ensuring continuous availability and easy updates.

Full Stack Amazon Clone
- https://clone-c9f72.web.app/
- Designed and developed the entire **full stack application** from scratch, and styled it using **Material UI**
- Added **authentication** using Firebase, allowing users to create accounts and log in using their credentials
- Implemented full shopping cart functionality, including adding products and checking out
- Used **Stripe** for payment processing, with API calls made using **axios**.

Admin Dashboard UI
- https://main--teal-alpaca-114fa7.netlify.app/
- Created a robust commercial dashboard using **React**, **SyncFusion**, and **Tailwind** CSS.
- Integrated a wide range of essential components, including Kanban boards, text editors, calendars, and color pickers, enhancing the application's functionality.
- Implemented interactive charts (line, pie, bar, etc.) for seamless data visualization.
- Designed feature-rich tables for efficient management of employees' data, orders, etc.
- Enhanced user experience with customizable color options and light/dark mode support.

Netflix Clone
- https://netflix-clone-bb46e.web.app/
- This project is a simplified front end clone of Netflix. It was created with React and CSS (Grid and Flexbox).
- It uses The MovieDB Api to search for movies and display the details.
- It is deployed using Firebase.
